JOUR
DE LA
TERRE
•CA

Earth Day expressed a need for application that could help :

Organize multi-parties' interactions

Optimize (by reducing waste) the gleaning process in Canada

Solution: Green Sharing

Personalization of the user experience

Interactive map

Gamification with the Review/Score feature

Ability to prioritised event (high/urgent, mid, low)

Agile Method

Use the link below to see the prototype on your device:

<https://green-sharing.netlify.app/>

<https://greensharingapi.azurewebsites.net/swagger/index.html>

PERSPECTIVES

Carpooling capabilities between gleaners

Ludification of the platform with a gallery page and satisfaction analysis using ML tool

OAuth Support (google/facebook) (*already supported need to be completed*)

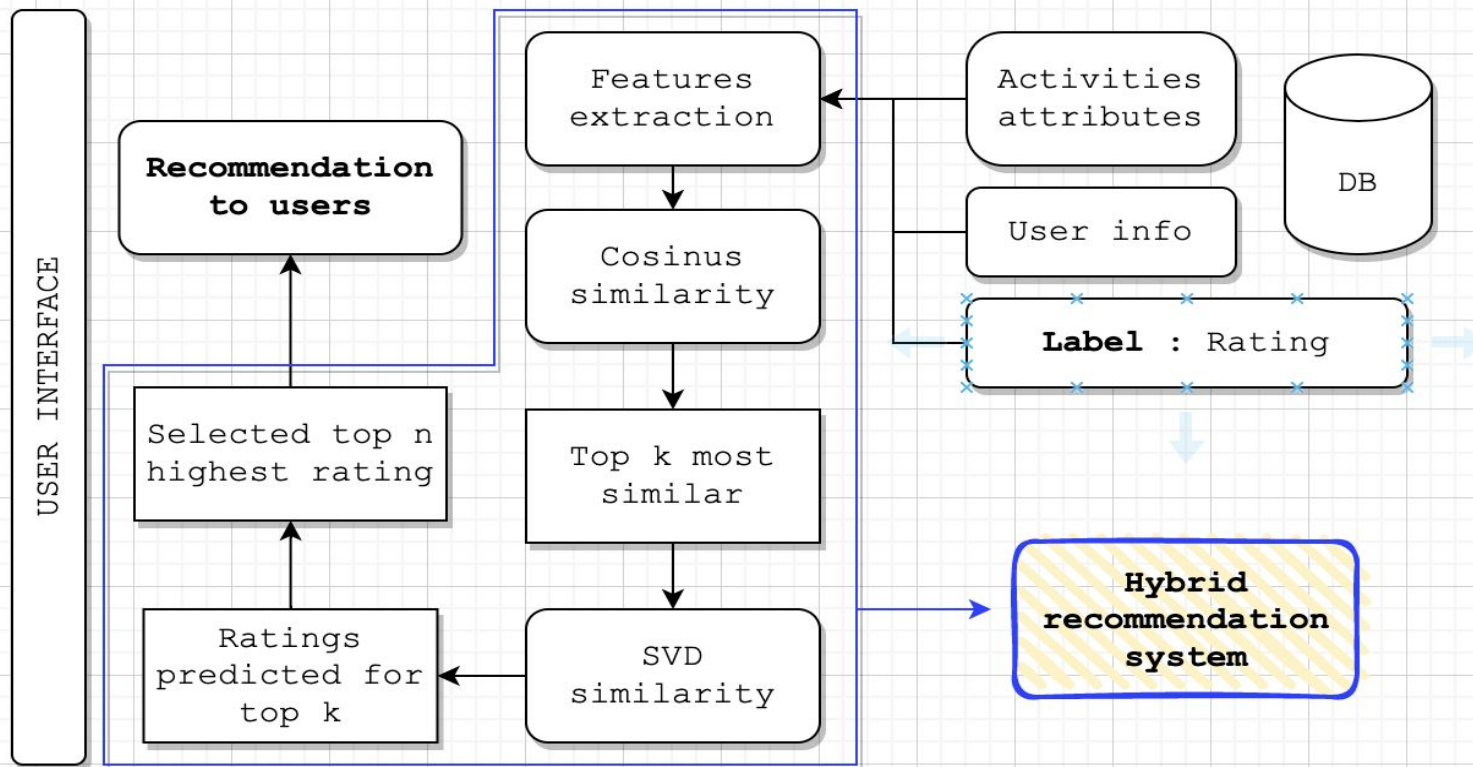

Offline mode enabled

Automatic matching on Gleaning Events/Gleaner/BankFood using ML model

MODEL RECOMMENDATION SYSTEM

WHY Green Sharing?

A ready to plug application

Made with modern spread technologies chosen

Easy to use and accessible app on any device

Eco-Friendly application

Delivery package

Green Sharing App

FIGMA design

MCD + XMD + ML Diagrams
