

## TEAM 11 - Green Sharing

Abdoul Sadikou  
Bassel Assi  
Jeanne Audrey Mboua Bitoungui  
Myyank Shukla  
Marguerite Mireille Camara  
Van Nam Vu  
**Mentor : Marcel Tawe**

# Problem

EARTH  
DAY  
•CA

JOUR  
DE LA  
TERRE  
•CA

Earth Day expressed a need for application that could help :

- Organize multi-parties' interactions
- Optimize (by reducing waste) the gleaning process in Canada

# Solution: Green Sharing

Personalization of the user experience

Interactive map

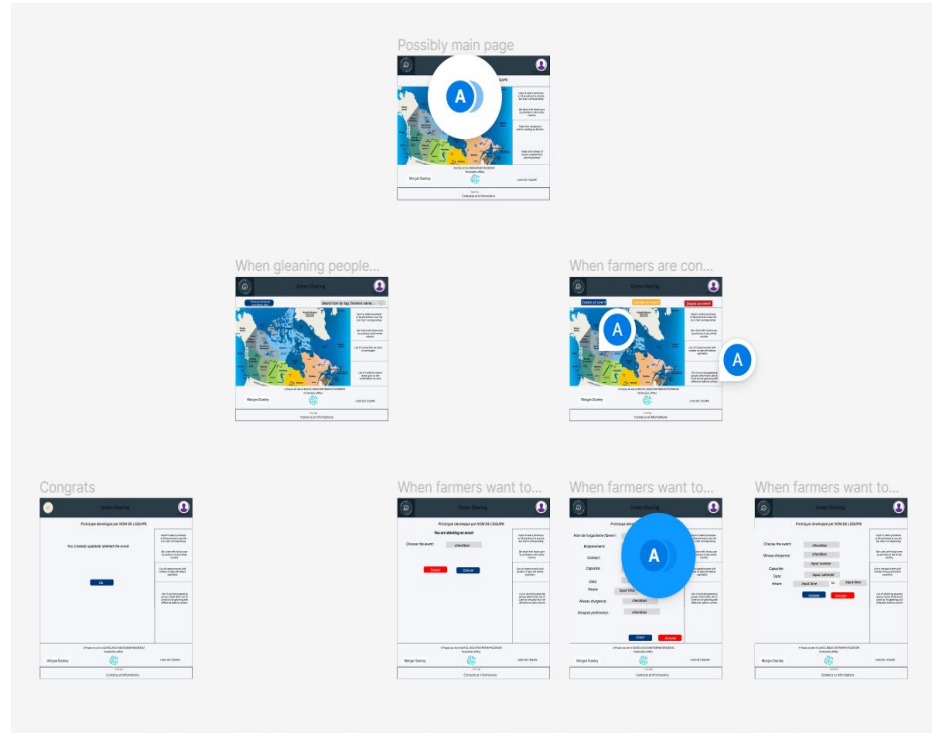

Gamification with the Review/Score feature

Ability to prioritised event (high/urgent, mid, low)

# Agile Method

- creation of an interactive prototype on Figma [GreenSharingPro](#)

# DEMONSTRATION

Use the link below to see the prototype on your device:

# PERSPECTIVE

Carpooling capabilities between gleaners

Ludification of the platform with a gallery page

OAuth Support (google/facebook) (already in the DB)

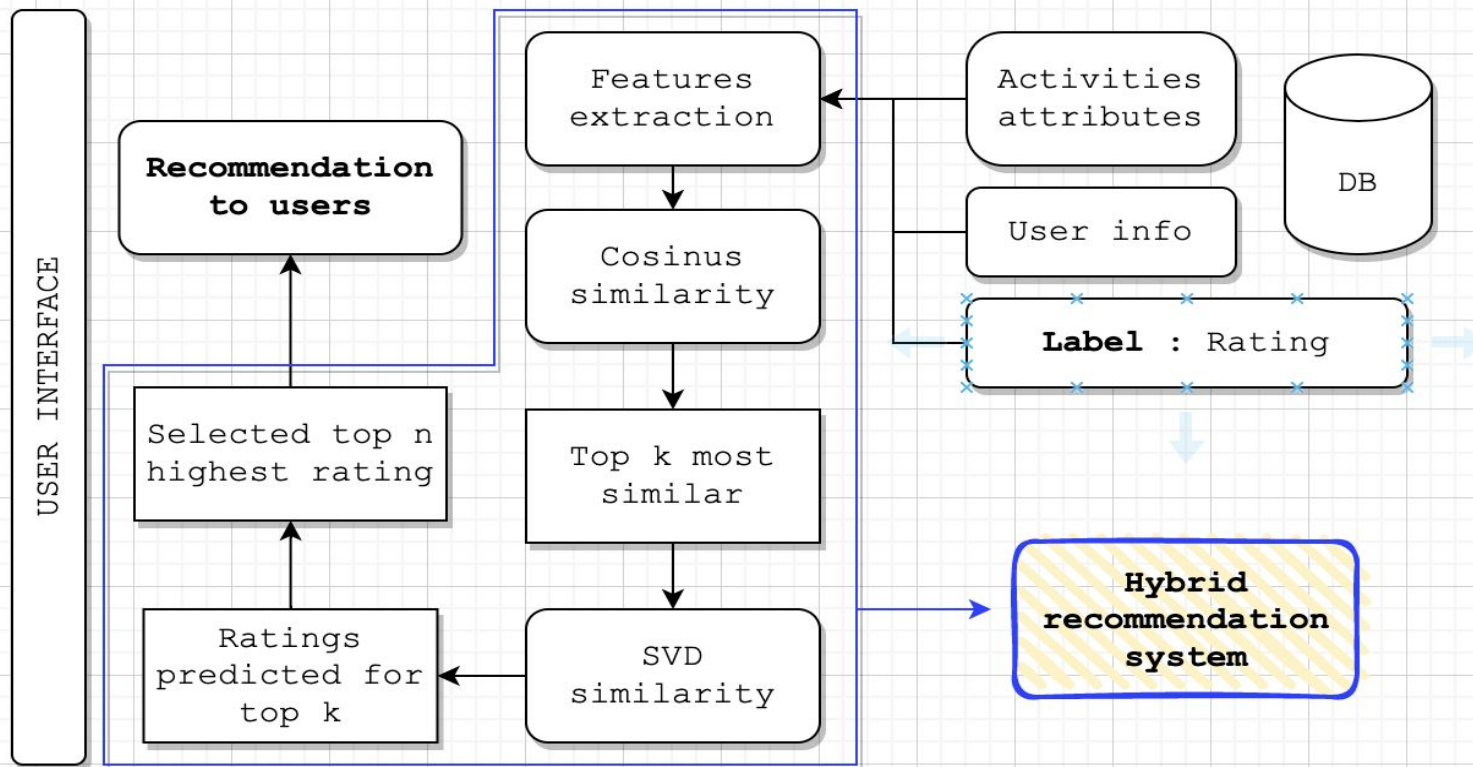

Offline mode enabled

Automatic matching on Gleaning Events/Gleaner/BankFood using ML model

# MODEL RECOMMENDATION SYSTEM

# WHY Green Sharing?

A ready to plug application

Common spread technologies chosen, with a ready to go app to allow developers community to contribute on future coding with minimal efforts

Easy to use and accessible app on any device

Eco-Friendly application

# Delivery package

Green Sharing

FIGMA design

MCD + XMD + ML Diagrams

GitHub

Use cases documents
